PROFESSIONAL SUMMARY

SQL Server Database Administrator and SolarWinds Administrator with four years of experience in the management of production SQL environments, Azure SQL databases, performance tuning, backup and restoration, high availability solutions, and round-the-clock support. Possesses strong expertise in SQL Server installation, configuration, migrations, security administration, monitoring, troubleshooting, and automation, along with proficiency in network monitoring, performance optimization, and network management. Dedicated to improving system performance, ensuring data integrity, and supporting reliable IT operations.

PROFESSIONAL EXPERIENCE

MS SQL Server & Azure DBA – Wissen Infotech

January 2022 – Present | Bengaluru

- Monitored and maintained over 700 SQL Server instances across DEV, QA, and Production environments, ensuring high availability and optimal performance. Executed daily health checks, backups, disk cleanup, and performance tuning, including index reorganizations and statistics updates, reducing query latency and improving system responsiveness.
- Installed and maintained instances of SQL Server from 2008 to 2022. Implemented Row-Level Security and Dynamic Data Masking within Azure SQL. Automated maintenance tasks on a daily, weekly, and monthly basis, including index rebuilds/reorganizations, DBCC checks, and statistics updates. Administered configurations for SQL Server High Availability and Disaster Recovery.
- Led migration of 5% of critical databases from on-premises to Azure SQL, enhancing scalability and disaster recovery capabilities. Implemented security best practices by removing unwanted user permissions, strengthening data protection and compliance. Automated routine maintenance tasks to improve operational efficiency and minimize manual intervention, ensuring 24x7 database availability.
- Collaborated with Mirroring, Clustering, and Replication to ensure High Availability and Disaster Recovery. Installed and configured SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS), and SQL Server Analysis Services (SSAS). Executed upgrades for SQL Server service packs and cumulative updates. Oversaw SQL Safe backups, encompassing Full, Differential, and Log backups.
- Managed and resolved over 1000 database incidents, while configuring and optimizing more than 500 SQL Server instances to improve performance and ensure system reliability. This highlights the DBA's responsibilities in incident management and configuration activities.

SolarWinds Admin – Wissen Infotech

January 2022 – Present | Bengaluru

- Implemented SolarWinds Modules NPM, NCM, NTA, WPM, SRM and VMAN to ensure comprehensive monitoring in a single pane of glass, improving SLA compliance by 80%. Managed deployment, configuration, and maintenance of SolarWinds Orion Platform for network monitoring, reducing downtime by 90% through proactive alerting and diagnostics.
- Designed and implemented custom SolarWinds NPM and SAM templates tailored to organizational needs, enhancing incident detection and response efficiency. Conducted regular performance tuning of SolarWinds infrastructure to ensure optimal system operation and resource utilization. Collaborated with cross-functional teams to troubleshoot and resolve network issues identified through SolarWinds alerts and reports.
- Implemented SolarWinds High Availability (HA) solutions to ensure continuous monitoring capability and minimize downtime. Worked on Upgradation, Migration and all troubleshooting related to Orion errors. Creation of SOPs, documentation, processes and procedures for SolarWinds. Creating custom views/dashboards for the application teams as per the requirement.
- Performed 24x7 real-time monitoring of infrastructure events and alerts using SolarWinds. Monitored Network/Server infrastructure and actioned on alerts as per the SLA. Executed routine checks to ensure server health and performance for Critical Application. Escalated incidents to appropriate teams or individuals as per defined protocols. Collaborated with Level 2 support for issue resolution and documentation. Maintained accurate records of server-related activities and incidents. Assisted in implementing and maintaining monitoring tools and systems. Monitored storage arrays and performed basic troubleshoot.

EDUCATION

Karpaga Vinayaga College of Engineering and Technology – Chinna Kolambakkam
Bachelor of Engineering in Computer Science and Engineering

July 2021

Certifications

Azure Fundamentals (AZ 900)

August 2024 – August 2026

CORE SKILLS

SQL Server Administration (2012–2022), Azure SQL Database & Elastic Pools, Backup/Restore, Log Shipping, Mirroring, AlwaysOn, Performance Tuning & Query Optimization, Security Management, Auditing, Role-Based Access, SQL Server Migrations & Upgrades, SQL Server High Availability (Mirroring, Clustering, Replication), Dynamic Data Masking, Row-Level Security, Automation (Maintenance Plans, Task Scheduling)

Microsoft SQL Server: SSMS, SQL Profiler, SSRS (SQL Server Reporting Services), SSIS (SQL Server Integration Services), SSAS (SQL Server Analysis Services)

SolarWinds: Network Performance Monitor (NPM), Server & Application Monitor (SAM), Network Configuration Manager (NCM), IP Address Manager (IPAM), Storage Resource Monitor (SRM), Web Performance Monitor (WPM)

Network: Meraki, CATO, Fortinet, Wireshark

ITSM: ServiceNow, SummitAI, SolarWinds Service Desk

Scripting: PowerShell, Bash, Python

Cloud: Azure, AWS
